PROJECTS

SKILL SWAPP

Full Stack developer

JUN 2024 – AUG 2024

Description:
SkillSwap is a web-based platform designed to connect individuals who want to exchange skills. The platform allows users to find people who need the skills they can offer and those who can teach them the skills they want to learn.

Technologies Used:
Backend: Laravel (API)
Frontend: React, Bootstrap
Database: MySQL
Hosting: AWS Lightsail

Key Features:
Secure authentication and user management Responsive and user-friendly UI Real-time messaging system for communication Matching system to connect users based on their skills User profiles with listed skills (offered & needed)

Outcome:
This project enhances networking opportunities and facilitates knowledge sharing in a structured and efficient way. The platform aims to create a collaborative learning environment for skill development.

Skills

- JavaScript
- Python
- React.js
- Node.js
- HTML
- Laravel Filament
- Node.js
- CSS
- Django
- SQL
- RESTful
- APIs
- Agile/Scrum
- Laravel
